Biography

Solutions-driven software developer with an 8-year track record working with a variety of technology and software stacks. I have extensive experience in Software Project development, deployment and management using a varying array of platforms, solutions and frameworks. Valuable team member who has experience diagnosing, and troubleshooting problems and developing robust solutions.[1]

Work Experience

Lead Developer

02/2023 - today

E-Net

I build, and manage, many OSS, and BSS, integration points for the company using a purpose built ESB applications.

ICT Engineer

04/2021 - 01/2023

National Data Management Association

My roles include project manager, lead developer, and client liason, on multiple projects. I build, and deliver, full-stack solutions for iOS, Android, and the web. I handle very large datasets, logging of incoming data, and recovery management.

Senior Software Engineer

03/2016 - 04/2021

IntellectStorm

Worked with clients, analysts, programmers and other team members to develop technical solutions for complex business problems. Self-manage work activities to meet plans, monitor progress, and report status.

Web Administrator

06/2011 - 05/2013

Archis Technologies

Trained subordinates in programming and program coding. Designed and developed enterprise wide data analysis and reporting solutions. Lead programmer with a track record of incorporating user and business requirements into cost-effective, secure and user-friendly solutions known for scalability and durability.

Web Developer

01/2011 - 06/2011

E-Networks Inc

Built and designed the corporate website using Adobe's Flash. Worked with a professional, diverse team.
